Accessibility conformance evaluation (WCAG-EM)

Prepared for	Bäckerei Muster
Prepared by	Pixel & Co
Date	5 October 2026

Summary

55 success criteria evaluated: 41 passed, 1 failed, 13 not applicable, 0 cannot tell (not yet decided).

Not all criteria are met in the evaluated sample. The failed criteria are listed with their remarks.

Scope of the evaluation

Public pages of the Bäckerei Muster website (home page, desktop and mobile)

- Standard: WCAG 2.2 AA; EN 301 549 (clause 9)
- Mapping WCAG 2.2 to EN 301 549: 2026.10 (2026-10-12)
- Automated tests: surjection 1.x

Sample of pages

The evaluation covers 1 page (page states and flows count as separate entries).

#	TITLE	URL	DATE
1	Bäckerei Muster	https://baeckerei-muster.example/	5 October 2026

The sample is the list of pages checked in the automated run. WCAG-EM recommends a structured and a random sample; Surjection does not select the sample, so its representativeness is the evaluator's responsibility.

Failed criteria

- 1.4.3 Contrast (Minimum): Opening hours in light grey on cream (2.0:1). Darken the text to #5c5c5c. (Planned fix: 2026-10-12)

Method

Each success criterion was evaluated by a person with the help of automated tests (axe-core, Surjection) and a manual checklist. The outcomes follow the terms of WCAG-EM: passed, failed, cannot tell, inapplicable. A criterion counts as passed only when a person decided so.

Limits

This report is not legal advice and does not confirm conformity with WCAG, EN 301 549 or the European Accessibility Act. EN 301 549 clause 9 corresponds to WCAG 2.1; criteria that exist only in WCAG 2.2 have no clause there. The mapping is maintained by Surjection and may change between versions.
